

Mint Update Information

As Centra Credit Union completes our upgrade to digital banking, Mint aggregation services may be interrupted for up to five business days after July 19, 2022. Mint.com data is stored on Intuit cloud servers. Data is updated with every change and cannot restore data to a previous point in time.

For a successful account update, do not log into your Mint.com until five business days after 8am on July 19, 2022.

During this time, the Mint.com server will automatically make the needed updates for your activated accounts. If you log into Mint.com during the five business days following Centra's digital banking upgrade, you may see duplicate accounts or an error displayed. Please do not attempt to change the status or make any changes in Mint.com during this time. After five business days, the accounts should reconcile showing your transaction history available.

In the event that your accounts don't display current transactions after five business days, you may log back into Mint.com and click refresh  to update the account. After the download completes, click the Transactions tab to view up to 90 days of transaction history.
